Our Mission
To provide quality patient care at every point of service;
to respect the dignity and uniqueness of all patients;
to promote safe medical practices;
to encourage medical research;
to permit access to all seeking healthcare; and

to maintain fiscal soundness.

CHARITY CARE PROVIDED BY CHWC

The hospital maintains records to identify and monitor the level of charity care provided. These records include the amount of charges forgone for services and supplies rendered under its charity care policy. The following information measures the level of charity care provided. The first graph shows charges foregone (based on established rates). The second graph shows the equivalent percentage of charity care (reductions to total charges). This work is conducted under the accordance of the Charitable Care Policy of Community Hospitals and Wellness Centers, supported in part by the SHARE Foundation.
For the past 26 years, the SHARE Foundation of CHWC has received contributions, gifts, and bequests for the specific purpose of providing healthcare for those persons who have become financially disadvantaged. The total assets of the SHARE Foundation, as of September 30, 2016, were approximately $5.9 million. The SHARE Foundation works hand in hand with the Charitable Care Policy as established by the Hospital Board of Directors.

**Major Capital Investments During 2015-2016**

The major equipment investments during this fiscal year were done through combined efforts of individuals, hospital auxiliaries, and hospital operations. The primary breakdown of investments is:

- $193,636.00 was invested to sustain our Information Technology platform hardware
- $192,930.00 was invested for a Haloflex Energy Generator (Bryan Surgical Services)
- $179,185.00 was invested for a Hemodynamic System for Bryan Catheterization Laboratory
- $155,527.00 was invested for advancements at our Bryan Radiation Oncology Center
- $133,810.00 was invested for Carescope B650 Anesthesia Monitors
**OUR HOSPITAL EMPLOYEE TURNOVER INFORMATION**

*OCTOBER 1, 2015 thru SEPTEMBER 30, 2016*

*CHWC Employed a Twelve Month Average 718 Employees*

(Terminations divided by Average number of employees = turnover rate)

</tr>
</tbody>
</table>

**Voluntary Terminations:**
We experienced 93 voluntary terminations during the year. This represents a 13% voluntary turnover rate. This rate was 11% in 2014/2015. The most common reasons were:
- 51 employees left for another job
- 19 employees resigned
- 4 employees relocated
- 14 employees retired

**Involuntary Terminations:**
CHWC terminated the employment of 8 employees during the year.

We have carefully assessed our terminations. We consider an 13% voluntary turnover rate (and 15% overall) an appropriate and acceptable rate. We are monitoring activity in Radiology, Medical Technologist and Cardiopulmonary Care, though low actual termination numbers were not significantly different from the previous year.
A PROGRESS REPORT ON ADDRESSING COMMUNITY HEALTH

2016 Community Health Needs Assessment (CHNA)

In 2013, both Bryan and Montpelier hospitals provided substantial funding toward a Comprehensive Community Health Needs Assessment for Williams County. This effort was carried out in partnership with the Williams County Health Department, Williams County Schools, various social welfare organizations and Parkview Physicians Group Ohio. We contracted with the Hospital Council of Northwest Ohio to carry out the survey. Once the data was compiled we formed a community assessment group (adding K-12 schools, non-profit mental health providers, faith-based groups, local law enforcement and the Williams County YMCA) to discuss and make plans for interventions. This entire effort was renewed in 2016 with all the same partner organizations. Our reports are posted at the hospital web site for public review (www.chwchospital.com).

The 2016 survey results made clear the community continues to have the same health status issues that are a national dilemma. In September 2016; the CHWC Board of Directors approved three-year strategic implementation plans for both Montpelier Critical Access Hospital and Bryan Hospital. CHWC’s specific efforts will focus on our continued efforts to adopt and implement of the Healthy Hospitals Initiative promoted by the American Hospital Association. We will also work on the issue of access the mental health therapy for school aged children and attempt to address the issue of food insecurity. For the food insecurity effort we are working with the Promedica Health System in Toledo, Ohio to adopt the primary elements of their hunger initiative.

The CHWC Family Supports Our Community in Many Ways

- We Serve on Community Boards and Give Leadership

- High School Concessions Volunteer
- Community Halloween Parties
- Community Summer Events
- Bryan Jubilee & Day in the Park
Patient Safety is Paramount

Eliminating Error; Reducing Harm

Participation in “On the CUSP: Stop Blood Stream Infections” (BSI) Program

About 250,000 central-line associated bloodstream infections (CLABSI) occur in hospitals each year, and it is estimated that between 30,000 and 62,000 patients die as a result. In the summer of 2009, CHWC joined a national initiative led by Johns Hopkins Hospital in conjunction with the Ohio Patient Safety Institute with the goal to reduce CLABSI. The specific goals of this initiative (which concludes in early 2011) include:

- Reducing the CLABSI rate within participating Ohio hospitals to less than one per 1000 catheter days
- Improve safety culture by 50 percent in participating hospitals.
- Disseminate the CUSP patient safety model for future patient safety initiatives.

2015 Update: CHWC still has not experienced a CLABSI since December 2009.

Over 80 Months of Sustained Excellence

Reducing/Eliminating Ventilator-Associated Pneumonia

Intensive Care Unit staff focused on reducing/eliminating ventilator-associated pneumonia (VAP). This is a very dangerous condition that can be prevented with vigilance. In the fall of 2009 the Intensive Care Unit nurses, cardiopulmonary respiratory care staff and all physicians made the commitment to adopt and uphold a set of evidence-based best practices (known nationally as the “Ventilator Bundle”) created by national and international research groups. Then we began measuring VAP rates.

2015 Update: We are pleased to report the CHWC VAP rate since October 2009 is STILL zero.

Over 80 Months of Sustained Excellence
What does this graph show?
- This graph details the proportion of adverse events at Bryan Hospital that the federal government believes were “potentially preventable”.
- Information is displayed since the first quarter of 2008, through the second quarter of 2016.
- The comparison is the national benchmark for ALL hospitals in the United States.

What is the source of the data?
The data is from the federal government and is displayed by the Wayfinder safety software developed jointly by Battelle Research in Columbus, Ohio and the Ohio Hospital Association.

What does the graph tell us about Bryan Hospital?
1. In general; Bryan Hospital has lower preventable harm scores when compared to all U.S. hospitals.

CHWC Aspiration #1: Continue to achieve LOWER preventable adverse events scores
CHWC Aspiration #2: ZERO preventable adverse events.
Bryan Hospital’s Prevention Score Ranking is better than 92% of all U.S. Hospitals.

Bryan Hospital’s Preventable Events added $366.38 in cost to every patient.

Associated Costs for Community Hospitals & Wellness Centers-Bryan Hospital (019)
Total: $135,560
$366.38 per patient

Wellness Accomplishment CHWC - LIVE IT:

A very popular community activity presented by one of our dietitians, Andrea Miller has been cooking demonstrations. The Wellness Committee wanted to offer cooking demos to the staff but found it difficult to reach everyone on all 3 shifts and at all three buildings. The Committee had worked with the BMU staff to tape presentations before but found it very costly. After talking further with the BMU staff, they said if we allowed them to show the program on the BMU television station, they could tape the program for free. Hence, the CHWC – LIVE IT series was born. On the first Thursday of each month a new program / cooking demonstration is taped in front of a live audience. Each month’s program has a unique name, theme and a different sous chef who is a hospital employee but usually has little experience in the kitchen. Andrea teaches the sous chef how to prepare the product while discussing the health benefits of the items prepared. The audience gets to sample the dish, receives a copy of the recipes and a small gift of food or spices to use when preparing the dish at home. Evaluations and comments have been very good concerning this program.
